New frontiers for media architecture: This compendium explores how digital media is shaping cities today and in the years to come. It illustrates groundbreaking use of light and media in urban environments through 30 winning or shortlisted entries from the Media Architecture Biennale Awards in 2018 and 2020 in six categories: Animated Architecture, Money Architecture, More-Than-Human Architecture, Participatory Architecture & Urban Interaction, Spatial Media Art, Future Trends & Prototypes. All projects presented in this book have been selected as outstanding examples at the intersection of architecture, media and interaction design. The selected projects are accompanied by international authors sharing their perspectives on digital placemaking.

All four editors are board members of the Media Architecture Institute, a non-profit organisation with offices in Vienna, Sydney, Beijing and Toronto.
